

```
1 # This function return all the values of dictionary in the form of List. for example
  :
2 A = {1 : "One", 2 : "Two", 3 : "Three"}
3 B = {'A' : "Apple", 'B' : "Bat", 'C' : "Cat", 'D' : "Doll"}
4 print(A.values())
5 print(B.values())
6
7 # OUTPUT: dict_values(['One', 'Two', 'Three'])
8 # dict_values(['Apple', 'Bat', 'Cat', 'Doll'])
