

```
1 # Create tuple from a set of a value is called packing.
2 t = (1,2,'a','b')
3
4 # and its reverse ; as per follwing syntax.
5     # <variable>,<variable>,<variable>,<variable>,..... = t
6 w,x,y,z = t
7
8 # Creating individual value from a tuple's element is called unpacking.
9
10 print(w) # 1
11 print(x) # 2
12 print(y) # a
13 print(z) # b
