

```
1 # function simply removes all items from the dictionary. for example:
2
3 A = {1 : "One", 2 : "Two", 3 : "Three"}
4 B = {'A' : "Apple", 'B' : "Bat", 'C' : "Cat", 'D' : "Doll"}
5 A.clear()
6 print("Length of dictionary A is :", len(A))
7 print("Length of dictionary B is :", len(B))
8
9 # Output:Length of dictionary A is : 0
10 # Length of dictionary B is : 4
11
12 # NOTE : This function only remove element/items from the dictionary. It does not
13 # delete the dictionary..
14 print(A)
15 #Output:{}
